## GTCC Course Descriptions

### ENT 135 Recording Engineering I. 3.

This course covers basic topics in the operation of an audio recording studio. Topics include audio theory, console, tape machine, and processor operation, proper microphone placement, multi-track mixing techniques, and session procedures. At the completion of the course, students should be able to record, mix, and edit in recording sessions.

### ENT 235 Recording Engineering II. 3.

This course continues the study of recording studio procedures learned in Recording Engineering I. Topics include advanced digital recording, special effects, production techniques, engineer's record keeping, studio maintenance, and analysis of current commercial products for engineering techniques. Upon completion, students should be able to set up and run complex recording sessions and mix down commercially viable recording. Prereq: C or better in ENT 135.

### ENT 237 Recording Engineering III. 3.

This course covers the principles and basic concepts of acoustics in sound recording and reinforcement. Topics include various acoustical properties, waveforms, resonances, frequencies, and responses and real-life applications in recording studios and live performance facilities. Upon Completion, students should be able to describe basic acoustical properties and concepts and apply them in sound productions in studios and live performance facilities. Prereq: Math 110 or Math 143

### MUS 214 Electronic Music I. 3.

This course provides an opportunity to study and explore various electronic instruments and devices. Emphasis is placed on fundamental MIDI applications and implementation, features and application of sequences, sound modules, and digital keyboards. Upon completion, students should be able to demonstrate proficiency by creation of appropriate musical projects using the equipment and techniques covered. Prereq: C or better in MUS 111
